

ESPM-157: Data Science for Global Change Ecology

Carl Boettiger

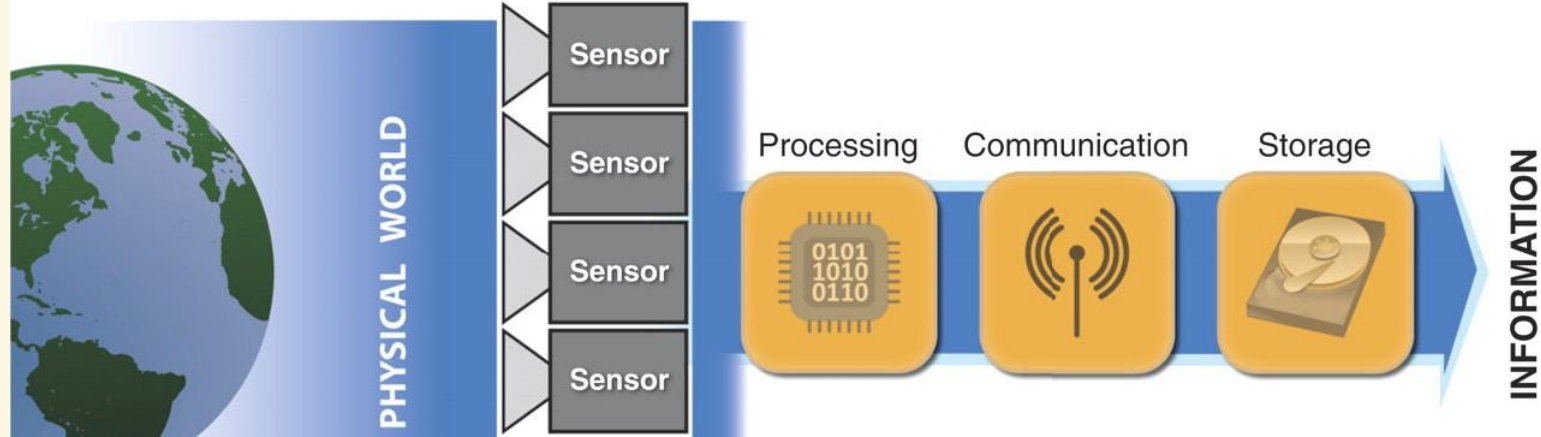

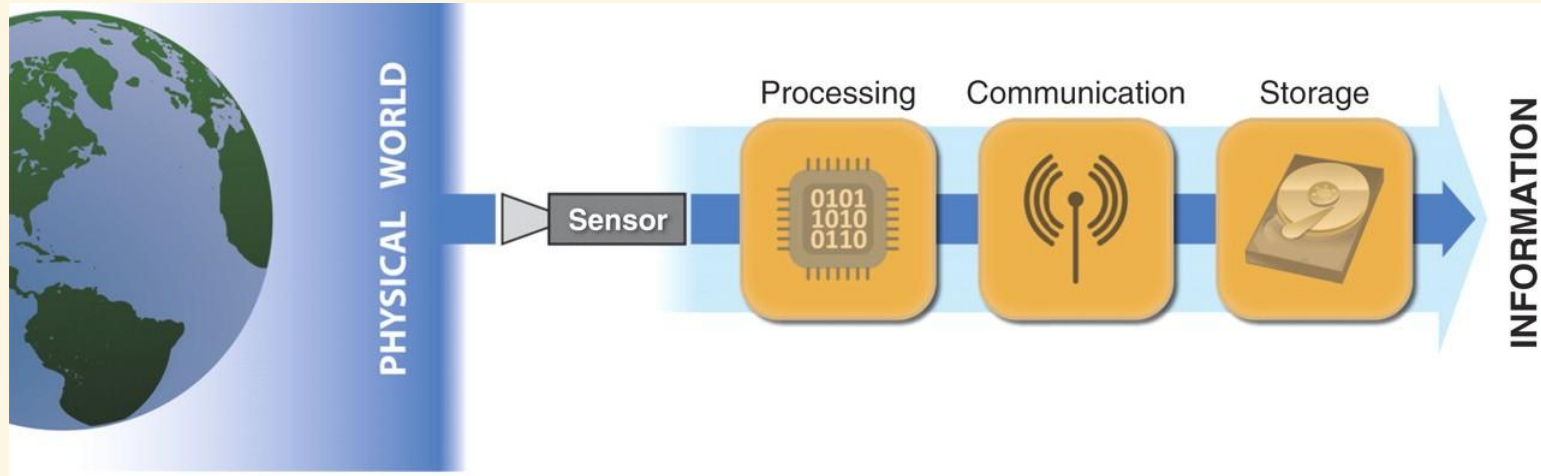

**Great Challenges,
Great Opportunity**

Cyanerpes, Feb. 24, 1958, II.

(58)

of the time he was around (but none with tail raised like the one I saw & drew on Feb. 21, p. 47). He certainly gave an R from an St. posture like the one I drew on Feb. 22, p. 50. Once he went into an even more extreme St., without call of any sort. Course ca.

Definitely hanging on the heart loop.

I couldn't see what elicited this, or what response, if any, it induced.

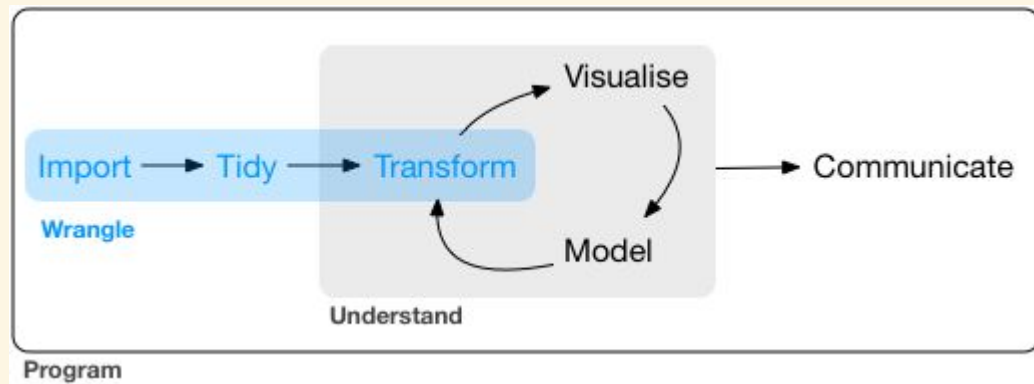

Cyanerpes, I

Barro Colorado

The youngest of the 2 immature Blue ♂'s has been singing a lot this morning. Most (but not all) of his WS's were introduced by 1 or (more frequently 2) notes which seem to be indistinguishable from ordinary HCN's, and a few of the phrases ended with a single similar note. This would seem to indicate that the motivation of the WS contains a hostile component.

I have once seen this immature make a supplanting attack on the new ♀ immediately after a WS; but this is the only case of the sort I ever remember observing. So the WS cannot possibly contain a relatively very strong aggressive element.

I have seen quite a number of long & violent disputes between wild Blue ♂'s (in full nuptial plumage) yesterday and

should be able to complete initial exercises, while teams with greater prior experience are expected to push those boundaries by going deeper into the analysis and presentation. Workflows and communication are central elements to each module. All work should appear in professional and well documented format using RMarkdown notebooks in the project GitHub repository and pass all automated checks on Travis-CI.

Pedagogy

1. Learning is an **active process** of engaging and manipulating objects, experiences, and conversations in order to build mental models of the world (Dewey, 1938; Piaget, 1964; Vygotsky, 1986).
2. Learning builds on **prior knowledge** (eg Alexander, 1996).

Pedagogy

3. It is necessary to think of learning as a **social activity** (Bransford, et al., 2006; Rogoff, 1998)
4. Learning should be situated in an **authentic context** (Greeno, 2006; Kolodner, 2006).
